

Automate document input from email attachments

Working in the background, COLLECTOR detects any file attachment (PDF, TIF, PNG, etc.) and immediately transfers it to either INVOICES or DOCUMENTS.

- The destination is determined by the email address.
- Email attachments that are image files (containing the actual forms or documents) are interpreted.
- Email header and body text can be saved as a separate PDF.

The main benefit is that emailed data is automatically processed, just like paper documents. Identical business rules are applied and the data is transferred to your host system in the same way.

Depending on your settings, your incoming attachment may be ready for downstream processing in a matter of seconds.

With COLLECTOR, you will:

Reduce handling costs

No need to manually check incoming email attachments. As long as they arrive in the correct inbox, they are opened and imported automatically.

Speed up your processing

Automatically handle incoming documents instantly.

Improve control

Email is sorted automatically and all sender information is retained.

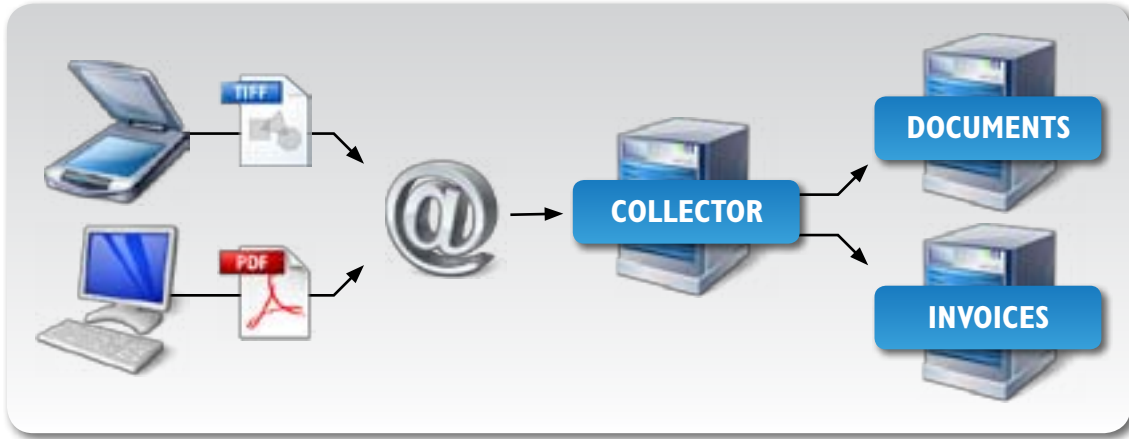

Technical capabilities

- Capture of image files – PDF, TIF, PNG, etc. from email attachments.
- Seamless import of emailed documents into DOCUMENTS and INVOICES.
- Easy set-up
- Completely transparent

Business system integration

COLLECTOR works with DOCUMENTS and INVOICES by ReadSoft, which seamlessly integrate with most business systems on the market.

COLLECTOR 6-2: Hard facts

Email image file attachments from various sources are detected and sorted by COLLECTOR and transferred to DOCUMENTS or INVOICES.

Supported products

DOCUMENTS 6-4 SP1 and later

INVOICES 5-5 SP4 and later

Software requirements

Microsoft .NET Framework 3.5 SP1 or later

Microsoft SQL Server 2005 or 2008
(Latest Service Pack recommended)

Mail servers

Supports mail servers that use standard MAPI and IMAP messaging protocols.

It has not been possible to test all possible MAPI or IMAP configurations in connection with all available mail servers. However, a list of tested servers can be found in the release readme file.

Supported attachment file formats

All the 20+ formats supported by DOCUMENTS and INVOICES, including PDF, PNG, TIF, BMP and JPG

Product localization

- English

System requirements

- Microsoft Windows 7 (32-bit or 64-bit version)
- Microsoft Windows Server 2008 and R2 (32-bit or 64-bit version)
- Microsoft Windows Vista (Business or Ultimate)
- Microsoft Windows XP Professional
- Microsoft Windows Server 2003 SP2 and later (32-bit version only)

The latest service pack and hotfixes for the operating system should be installed.
